

HACETTEPE UNIVERSITY

DEPARTMENT OF COMPUTER ENGINEERING

NAME-SURNAME: DOĐUKAN BERAT KARATAĐ

NUMBER: 21527142

LECTURE: SOFTWARE LABORATORY I (BBM 203)

1) **PROBLEM:** Comparing Texts According to Their Terms

2) **AIM:**

To distinguish two or more given texts as "non-numeric" first. Then find out how many times each of the calves has passed in this text and sort them accordingly. Write the table according to how many of the first 10 bales pass in each of the 2 files after the order.

Note: I know I can not do homework, but at least I want to send as much as I can.
